FactorSoft® Third-Party Interfaces

FactorSoft offers several third-party interfaces that allow users to interact with online services without having to leave the system:

HUBTRAN – Revolutionize your back office by automatically auditing and processing funding requests and documents from clients. You can directly interface with debtors to quickly verify loads and ensure you know what you're buying.

ANSONIA – AN EQUIFAX COMPANY – Automatically track debtors, receive alerts within FactorSoft, and initiate credit searches with Ansonia without having to leave the system. At the click of a mouse, FactorSoft begins a web dialog with Ansonia, requests the necessary clarifications, and immediately delivers a credit score.

FIRST CORPORATE SOLUTIONS – Simplify the process of monitoring accounts for lien filings. Whenever First Corporate Solutions finds a filing, affected clients and debtors are automatically flagged in FactorSoft with outstanding alerts. You can even choose to prevent purchases with the involved parties.

SAFERWATCH, A PRODUCT OF TRUCKSTOP.COM – Ensure the quality of the carriers and brokers you lend to. The SaferWatch interface monitors carriers for compliance, notifies you of critical changes you deem important, and captures them in FactorSoft. You can flag problem carriers, document your due diligence, and better protect your business.

ePAYMENT AMERICA – Give debtors a simple, secure, and convenient way to pay invoices online. ePayment America also gives lenders another way to collect fees – particularly helpful during due diligence.

RISKFACOR – Mitigate the risk of factoring. Riskfactor's proprietary metrics can help you reduce exposure, expand your portfolio, and protect against fraud. Daily uploads from Factorsoft ensure these metrics are accurate and up to date.
