LoanVantage® Mobile

Convenient On-the-Go
Tool for Lenders

Current market trends continue moving swiftly toward mobile usage, and the lending process is no exception. What if you could more effectively serve today's borrowers by giving your lenders a convenient way to take the LoanVantage on the road with them?

With the mobile application, you can give your lenders access to tools in the field rather than keeping them tied to their desk, and empower your lenders and executives with valuable functionality and accessibility while on-the-go.

Key features of the mobile technology include:

Dashboard

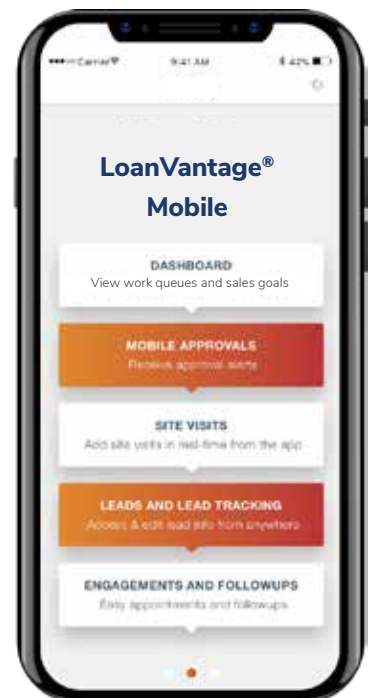

- View officer-specific information anytime and anywhere, including sales goals, document review and sorting, items past due, and more.

Mobile Approvals

- Speed up the decision process with alerts for approvals and loan presentation review.
- Indicate a digital decision for loans, including those that require committee review.

Site Visits

- Real-time flow into the LoanVantage that makes it easy to add a site visit right from the application. Indicate a visit is done, fill in a visit report, and add free-form notes or photos to go right into the loan file.

Note: Images shown on screen are for placement only and are not representative of the live app.

Leads and Lead Tracking

- Create, edit, or check lead information from anywhere, including updates to the probability of closure and tasks needed for completion.

Working with LoanVantage Mobile, you will:

- Equip lenders with all the information they need wherever they go, providing superior quality and flexibility of service.
- Gain seamless experiences through your lenders' ability to work offline and online.
- Significantly shorten the time lenders take to complete steps in the process.
- Benefit from instant and non-intrusive notifications, including approvals.
- Improve productivity and reduce costs.
- Increase communication between your employees, vendors, and consumers.
- Have all client information at your fingertips, including integration with core data.

There's no longer a need for your lenders to wait until they're back in the office to add information or access LoanVantage.
